

NATIONAL MINORITY HEALTH MONTH FOUNDATION 2006 LEADERSHIP SUMMIT ON HEALTH DISPARITIES

CLINICAL SESSIONS ARE SPONSORED BY THE INTERAMERICAN COLLEGE OF PHYSICIANS & SURGEONS

This activity is sponsored by an unrestricted educational grant from the National Minority Health Month Foundation. The Interamerican College of Physicians and Surgeons has been resurveyed by the Accreditation Council for Continuing Medical Education (ACCME) and awarded accreditation for four years as a provider of continuing medical education for physicians.

The Interamerican College of Physicians and Surgeons designates this educational activity for a maximum of 7 category 1 credits toward the AMA Physician's Recognition Award. Each physician should claim only those credits that he/she actually spent in the activity.

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the sponsorship of the Interamerican College of Physicians and Surgeons. The Interamerican College of Physicians and Surgeons is accredited by the ACCME to provide continuing medical education for physicians and takes responsibility for the content, quality, and scientific integrity of this CME activity.

NEED: In 2000, Healthy People 2010 established the elimination of racial and ethnic health disparities as a national goal. The summit will bring look at healthcare disparities including cardiovascular disease, infectious and respiratory diseases, diabetes, asthma / COPD, and renal disease in an attempt to provide integrated solutions which address these disparities. The goal of the program is to help to eliminate the disproportionate burden of premature death and preventable illness in minority populations (African Americans, Hispanics, American Indians, Alaska Natives, Asians, Native Hawaiians, and Pacific Islanders) through prevention, early detection and disease management.

EDUCATIONAL OBJECTIVES: Upon completion of the program, physicians will better understand: health disparities in minority population and cultural factors influencing symptom recognition and healthcare seeking behavior in minorities

TARGET AUDIENCE: Physicians interested in factors influencing the health of minority populations and diseases, which disproportionately impact minority communities.

AGENDA

WHEN	WHAT	WHERE
